INTRODUCTION

CARDbuyers is a new way to use crypto to buy your favorite games and your favorite stuff safely using Amazon gift card, Steam card, Apple card, Paysafe card or even Google play card. We are a new decentralized and anonymous cryptocurrency. CARDbuyers is open source and accessible to all currency. Our coin has a POW phase, so you can all get a chance to grab a few coins before it switches to PoS. We welcome you all to CARDbuyers.

CARDbuyers MISSION

Our mission is to provide our customers with the best working online shopping platform, while accepting their privacy and their anonymity. To be able to do this, we are integrating cryptocurrencies and a various number of gift cards as a payment method. To maintain such a network, we have made the decision to have a PoW/PoS/masternode coin. Having this masternode set-up allows us to offer our clients a more stabile and faster working network, which will result in better customer experience and a smoother cryptocurrency implementation.

INNOVATION

CARDbuyers is developing a new and innovating way to shop online. Therefore, we will launch a beta version of our platform in the 4th quarter. The beta version will then be completely examined with the help of our community and adjusted to their needs. This will leave us with a state of the art online shopping platform.

GOAL AND PURPOSE

Our goal is to provide customers with a completely decentralized and anonymous platform, where they are able to buy services and goods that fit their needs. This is one of the reasons why we have chosen to accept a various number of gift cards as a payment method next to CARDB coin. CARDbuyers will provide their customers with an online platform where they are able to purchase their favorite games and their favorite stuff.

START-UP PLAN

In today's crypto market, turbulent as it is, we often struggle with the implementation of it. This is why we have chosen to directly implement it on our CARDbuyers platform, to raise more awareness and to reach more customers, we at CARDbuyers have decided to give people the opportunity to buy at our store with gift cards. The beauty of this that it will attract people who are unfamiliar with cryptocurrencies and give them the opportunity to explore it. This way we are creating not only a platform which users can enjoy to shop, but a platform which will bring more crypto awareness. Next to various marketing and translation campaigns we will work strongly side by side with our community, which will give us a view on the customer's experience and an opportunity to optimize the CARDbuyers experience for everybody.
